Hello! This is my first LaTeX document offline.

1. Find

$$\int (2x^3 + 7x^2 + 8x + 3) \, dx$$

2. What does this code do?

```
1  def AddTwo(num):  
2      result = num + 2  
3      return result  
4  number = int(input("Enter a number"))  
5  AddTwo(number)
```
